

PRODUCT SPECIFICATIONS

Product: Saint-Gobain PAM Finland civil defense shelter isolation valve well SVK is available in sizes DN 70, 100 and 150.

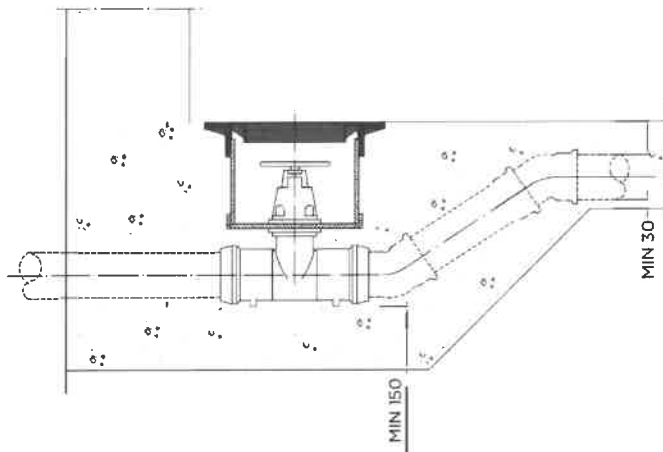

Purpose: Saint-Gobain PAM Finland civil defense shelter isolation valve well SVK is specifically designed to isolate the civil defense shelter drainage from the rest of the sewer system in crisis situations.

Use: The isolation valve well SVK is suitable for use in the Finnish civil defense shelter classification type K, S1, S3 and S6 shelters.

Standards followed: EN 1074-1, EN 1074-2 .

Working principle and suitability is in accordance with the Finnish HVAC card *LVI 06-10502: S1 class reinforced concrete civil defense shelter HVAC equipment*.

The valves have approval to be used as isolation valves in civil defense shelter drainage systems by VTT Technical Research Centre of Finland HVAC Technology Laboratory (Dno 97 – 33 / LVI33).
